Hi! Here are some instructions and notes for this introductory assignment:

• This course is very flexible in terms of how the Course Lead delivers content and materials.

Lead: Roy Prouty

April 20, 2021

- In order to work optimally with each student, please answer the following questions so that we can make the best of the time that we have!
- You can write as much or as little as you want for each of these.
- Please respond in complete English sentences unless otherwise specified.
- The final answers should be in PDF and emailed to the Course Lead.
- 1 Who are you?
- 2 What do you hope to get from this course?
- 3 What interests do you have related to Science & Math?
- 4 What about outside of Science & Math!?
- 5 At the end of this document is a word cloud of topics this course will aim to address, review this and answer the following questions.
- 5.1 Which of these have you never heard before now?
- 5.2 Which of these might you be most interested in discussing further if we find time at the end of the course?
- 6 Course Landing Page

1

- 6.1 Did you notice any typos or mistakes on the Course Landing page?
- 6.2 Were there any aspects of the Course Landing page that were difficult to read or to follow?
- 6.3 Who narrates the video linked on the Course Outline page?
- 6.4 What space mission took the photograph featured in the video?
- 6.5 Which of the images on the Course Outline page are 'real' images and which are artists' renderings?
- 6.6 For the 'real' ones, how can you tell?
- 6.7 And what is the subject of the 'real' images?
- 7 Daily, how much time do you expect to work on materials related to this course?
- 8 Please give each of your favorite: star, planet, constellation, & space mission (past, present, or future) and explain why.
